

WEBER CHIROPRACTIC OFFICE, S.C.
Making a difference in the quality of people's lives
Gentle Chiropractic Therapy – Acupuncture – Rehabilitation

Another Year – Another Anniversary – 29 Years and Counting
Thank you for allowing us to serve you

I don't know if it's the grey hair and I don't think I've lost much spring in my step, but the question seems to have come up more frequently in the last year about when I'm going to **retire**. The answer to that is **probably never**. I thoroughly enjoy what I do and feel I can make a positive difference in the quality of people's lives at various stages of life. This improves my quality of life and makes my life worthwhile in a unique way. We are all put on this earth with a purpose and I feel very lucky to enjoy what I do and not view it as "going to work." As one lady in her seventies once told me, "If you enjoy what you do, you never work a day in your life." In the past seven years, I have taken numerous courses in rehabilitation, acupuncture and nutrition. There are some things that I want to learn yet and that is going to take a few more courses and some more time. I feel life should be a continuous learning journey and each time I am introduced to something new, I come back with more ways to help you – the patients who trust me with their health. The **combination of chiropractic, acupuncture, nutrition and rehabilitation** offer a unique approach to treating people that I can do for a long time if the Almighty doesn't have some other plan in mind. My plan is to continue helping people lead healthier, more productive, and pain-free lives.

Age Really Doesn't Make a Difference

I am truly amazed at the diversity of ages that I see in my practice. Already this year I have treated a woman who is 99, another that is 95 and a man who is 90 and can put most people half his age to shame from a fitness standpoint. In that same time frame, I have treated two three-week olds who were having sleeping issues and giving their parents some sleeping issues as well. It gives me great hope for the future that I will have at least some answers other than drugs and surgery to offer as we face different health challenges. I see many people in their twenties who have significant health issues and are turning to alternative medicine to find answers for those challenges. People are getting tired of getting a pill for every ailment and with the overwhelming evidence that drugs cause over 100,000 deaths per year, I hope to have some of those alternatives to offer.

Advanced Proficiency Rated

At the January seminar of the Activator Technique, I passed the written and practical examination and achieved the technique's highest rating, **advanced proficiency rating**. Activator is the instrument I use in the office to make the specific adjustments to joints to restore normal movement to get you better. In the basic proficiency, there are about 30 different tests to help evaluate health problems. In the advanced proficiency, an additional 100 tests are added which gives me a better perspective on the causes of different muscle and joint problems and their corrections. This is just another way I continue to learn new and advanced ways of helping you.

Dining Package Drawing

The tradition continues during our May anniversary month and we will be giving away **four dining packages** to help celebrate 29 years in practice. The restaurants selected this year are **Timmerman's** in East Dubuque, **Fried Green Tomatoes** in Galena, **The Pepper Sprout and DaVinci's** both in Dubuque. I have enjoyed giving these away each year as it seems the patients who win them have never had the opportunity to eat at that special restaurant. Each time you are in the office through May 31st, your name will be entered in our drawing. This is just another way of thanking you for the privilege of helping each of you attain a better level of health – at any age.

Again, thank you for being our patient!
We appreciate you and look forward to serving you.
